### **DETAILED ACTION**

Newly submitted claims 50-54 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The method claim does not require the limitations of the apparatus, are much broader in scope, and would cause the examiner to start the examination process over.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 50-54 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

#### ***Claim Rejections - 35 USC § 112***

Claim 49 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 49 states that there is an apex for the curved surface, however applicant's drawing shows that a ring defines the distal most end of the surface. An apex generally means a single peak.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 21-30 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Pilgrim. The examiner considers the tip member of Pilgrim to show a curved surface that extends from the central axis to the outlet with an apex that is offset from the central axis. Outlets are generally rectangular as shown in 7.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 9, 21-31, 46-49 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sandmore et al USPN 6,059,760.

Sandmore shows a catheter having a first distal end 29' and a second distal end 45' in figure 12. The examiner considers the first distal end to have a curved surface extending from the central axis to ports on the side. While the distal end seems somewhat flattened, if not continuously curved (claim 49), merely to have rounded out the distal most tip would not be considered an unobvious modification. The apex is considered to point at a 45 degree angle from the central axis on the corners of the tip. Alternatively, with respect to the second distal end, merely to have offset the apex ever slightly from the central axis would not be considered an unobvious modification.

***Response to Arguments***

Applicant's arguments filed 2-9-2007 have been fully considered but they are not persuasive. The examiner disagrees with applicant. The redirecting surface of pilgrim starts "adjacent" to the central axis at the side opposite the lumen and extends to the outlet to form an offset apex.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
